PEM - 607

Installation, Maintenance and Operating Instructions

DESCRIPTION

Floor mounted EMERGENCY DELUGE SHOWER and NON AERATED EYE WASH combination unit. Shower is supplied with a 25mm stay open full flow ball valve, activated by a triangle pull rod and foot pedal. Eye wash is supplied with a 12mm stay open full flow ball valve, activated by a activation push handle or foot pedal.

Manufactured to comply with AS4775-2007.

SPECIFICATIONS SHOWER

SHOWER HEAD- 200mm ABS Cycolac ACTIVATOR-25mm Stainless Steel VALVE - 304 Stainless Steel

EYE WASH

EYE WASH- Non Aerated, PVC Plastic VALVE- 12mm Stainless Steel ACTIVATOR- 304 Stainless Steel Paddle Handle ACTIVATOR—304 Stainless Steel Foot Treadle STANCHION- 304 Stainless Steel Tube BASE PLATE- 304 Stainless Steel

1700

INSTALLATION

After unpacking carton, ensure all components are present. Mark out the floor and mount the bottom stanchion section using suitable anchors (10-12mm x 50 Dynabolt). Then assemble top section (use pipe sealant on all joints). Assemble pull rod and shower head, attach push handle and foot pedal. Once the unit is completely assembled connect water supply to 25mm top inlet nipple. Failure to use potable water can result in emergency units producing impure or contaminated water causing possible further injury. Test unit.

NOTE: This unit should be connected to an uninterrupted source of potable water, no less than 25mm (1"), with a minimum flowing pressure of 130KPa and a maximum static

pressure of 860 KPa.

OPERATION

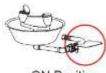

The shower is activated by pulling the triangle pull rod. Once the valve is activated the head will continue to discharge water until the valve is manually closed, this is done by pushing the pull rod to the off position. The eye wash is activated by foot pedal and pushing the activation push handle rearward. The unit will operate until the activation bar is manually pulled to the off position.

The eye wash is activated by pushing the activation push handle rearward. The unit will operate until the activation push handle is manually pulled to the off position.
